

## **Sabre Tactical Breaching Charges**

Our Breaching Charges work in real world situations.

We have done many real world explosive breaches.

Our Charges are made from Industry Standard materials.

Our Energetic Materials are proven World Wide.

Our Charges are very reasonably priced because we know Agencies have a limited budget.

Simple is still best. Why pay more for less.

We feel that we make a better product and that the Customer will decide who they use.

We care because we are Law Enforcement Officers ourselves; we know what it's like to breach for real.

When the talking stops, the training and results speak for themselves.

Sabre Tactical Training is a Federally Licensed User and Dealer of Explosives.

We back up our product with some of the best Training available.

We have a training manual we give out to each Student, we evidence what we teach.
